

Talking Drums of Belize

When young Patricia Parker went down to London to answer an advertisement for a job in the capital, she never thought that she would instead accept a very different kind of assignment that would take her to Central America from a stranger she met at her hotel. Neither did she expect to meet and fall in love with the handsome, dashing ex-soldier from America. And who was the young girl who was so similar to her that they could be twins? What is the secret of the Obeahman who influenced her life but whom she never seemed to meet? Would she have accepted the assignment if she had known in advance what was to befall her in this beautiful part of the world? Did she ever find out the secrets that could change her life forever? The answers are all contained within this book
